

Product Name: ZX122S2BPS PCISIG M.2 NGFF Socket 2 Key B passive breakout adapter, power measurement module – Page 1 of 3

Product Description: ZX122S2BPS is PCISIG M.2 breakout adapter providing access to all PCISIG signals as well as providing method of power supplies test and measurement. ZX122S2BPS is breakout adapter to be used for :

- 1- Test and measurement for signal quality, characterization , test and debug of any PCISIG signals via onboard 0405 SMD shunt landing pads.

a) Each PCISIG (excluding GND signals) are routed to 0402 SMD shunt package for easy probe access.

b) Each 0402 SMD shunt package may be wired for signal measurement via scope / test equipment.

c) Each 0402 SMD shunt package may be cut and redirected to another signal (onboard or offboard) for test and debug.

2- Measure and analyze power supply ripple, transients, Device Under Test, DUT, power consumption and more.

a) Each power supply rail is designed with current sensing power resistor, please see block diagram.

b) Utilizing scope probe – test equipment , measure power supply noise, ripples, transients, and DUT power consumption.

c) Utilizing eLoad (Electronic Load) , qualify host's power supply & maximum output power.

d) Identify power supply trace impedance, Rdc , for improved Host / DUT PCB design.

ZX122S2BPS features:

1- Provides access to ALL PCISIG signals via onboard 0402 SMD shunt packages

2- Onboard current sense resistors for all supply rails – Please see table 1 for details.

3- Listed number adjacent to each 0402 SMD shunt package represents the associated PCISIG M.2 connector's pin number.

4- All traces are 50 Ohms impedance controlled.

5- Four layers PCB design, inner layers are GND planes.

6- Accessible GND exposed copper, enabling for ease of access for test and measurement.

7- Mates with any key matching M.2 Host and Device / DUT

8- The module is shipped with 12pc of probing wires , ZX00BC2PH30 , See ordering information

Electrical:

Insertion loss > -2dB @6GHz
Trace impedance: 50 Ω
Operating Temperature: -65°C to +170°C
M.2 Edge Connector type (J1) : Key B
Mates with: M.2 Key B
Plating: Gold 100U
M.2 Receptacle (J2) :
Key Type: Key B
Height: 0.16" (4.2mm)
Spacer : 0.1" (2.54mm) – See Figure 3
Plating: Gold 100U
Current per pin: 0.5A (maximum)
Current Sense:
R1,R2 : 10mΩ 2512 SMD 7W - Thickness: 0.02" (0.5mm) Max - See Figure 3
Ratings: AEC-Q200
Temperature Coefficient: ±75ppm / °C
Operating Temperature:-65°C to +85°C at 100% listed power rating, see Table 1
-65°C to +170°C see section Power Rating on page 3
Shunt:
Package: 0402 SMD

Current Sense resistors: Table 1 lists onboard ZX122S2BPS current sense resistors and associated PCISIG M.2 connector assignment

Table 1

Current Sense Resistor	PCISIG M.2 Connector pin number	PCISIG M.2 Supply Rail	Description	Package	
				(inch)	(mm)
R1	2, 4,	3.3 V/VBAT	10m Ohms 1% 7W	2512	6432
R2	70, 72, 74	3.3 V/VBAT	10m Ohms 1% 7W	2512	6432

Compliance:

ISO2001 certified
RoHs - Lead Free
EU RoHS2
UL E111594 document
ELV- Vehicle Directive (Directive 2000/EC)
European Union Directive (203/11/EC)
Halogen Free per IEC-61249-2.21 : 2003
RoHs Directive 2011/65/EU
WEEE Directive (2012/12/EU)

Certificate of Compliance for Radioactive substances
Certificate of Compliance for Asbestos
Certificate of Compliance for Ozone Depleting Substances, ODS
Certificate REACH SVHC
Certificate of Compliance RoHS_EN_CoC

ZX122S2BPS package includes:

ASSEMBLY DRAWING

ITEM: ZX122S2BPS

DESCRIPTION: PCISIG M.2 NGFF Socket 2 Key B passive breakout adapter power measurement module

CHECKED:
M. MARINA

DRAWN:
MATTHEW CT

REVISION: 1.0
SHEET: 1 OF 3

Current Sense resistors: The current sense resistors may be removed if external electronic load , eLoad, is used. eLoad test equipment may be applied to ZX122S2BPS for power supply characterization , test and measurements. Eload suppliers : BK Precision , Chroma, Instek , Kikusui and more

Signal assignments: Table 2 exhibits the routed M.2 PCISIG signals on the ZX122S2BPS module.

1- Table 2 represents only the PCISIG M.2 Socket 2 Key B power supply and the assigned GND , PCISIG M.2 reference ground, signal assignments for “Socket 2 Key B” applications.

2- Table 2 represents only the PCISIG M.2 Socket 2 Key B signal assignments for the listed application. However; **there are other PCISIG** signal assignment for the M.2 Socket 2 Key B design configuration. All PCISIG M.2 assigned Power Supply rails and GND reference M.2 pin assignments are identical across PCISIG M.2 Socket 2 Key B solutions. Please apply your design signal name convention to non-power supply rail signals as the listed signal names on the Table 1 applies to the listed specific M.2 application.

Ground / Exposed Copper :
All of the PCISIG M.2 GND , reference ground , signals are connected to each other along with the 2 inner GND planes. In addition; the exposed copper on the ZX122S2BPS is the module's GND for purpose of rework and probing purpose.

PCISIG M.2 signals :
ZX122S2BPS passes through all PCISIG M.2 signals (excluding the power supply rails . All traces are 50 Ohms impedance controlled. ZX122S2BPS passes through the reserved “NC” No Connect signals as well.

Application: Bringup, testing, emulation, development, modular design evaluations
M.2 PCISIG Socket power supply test characterization
SDIO SSD SATA WWAN DP WIFI GPS GYRO Compass BT FM sensor module
Socket 2 Add-in Card Key B-E , Socket 2 DisplayPort Key B , Socket 2 SDIO Key E
Socket 2 WWAN Key C , Socket 2 PCIe-based SSD Key B-M , Socket 2 SATA-based SSD Key B-M
Socket 2 PCIe / USB 3.1 Gen1-Based WWAN Key B , Socket2 PCIe-Based WWAN Key B
Socket 2 USB3.1 Gen1-based WWAN Key B , Socket 2 SSIC WWAN Key B
Socket 3 PCIe-based Key M , Socket 3 SATA-based Key M

Mates with : Any standard M.2 NGFF PCISIG connector on host and device Key B
TE 2199125 2199119 2199230 2199133 JAE SM3ZS067
Bellwether: SD-80148 SD-80149 SD-80152 SD-80159 Amphenol

Module Insertion, Removal process:

In order to avoid any mechanical stress or damage to ZX122S2BPS, please follow the below listed guidelines for insertion and removal process:

- 1- Move the Module against the housing chamber, see figure 1
- 2- Rotate module to 25°, insert it until the module surface reaches the ramp, figure 2, 3
- 3- Rotate the module to horizontal position, see figure 4
- 4- Fix the module by screw, see figure 5

Note 1: **Label** is the labeled number on the adjacent 0402 SMD shunt package on the ZX122S2BPS module. The listed signal name in table 2 may vary depending to your M.2 design configuration. Please apply your design signal name convention to non-power supply rail signals & GND.
2: The supply power is available on the listed current sense resistor.

InfiniiMax RC Probe Heads

Tektronix P6243 scope probe

A photograph of a Tektronix P6243 active probe. The probe consists of a coiled, light-brown cable with a BNC connector at one end and a smaller connector at the other. The BNC connector is white and has a label that reads "Tektronix P6243" and lists specifications: "<1pF", "15MHz", "1GHz (50ohm)", "10kV", and "10V pk MAX". The probe is shown against a white background.8
